

## Amendment to the Specification

Replace the paragraph on page 9, lines 18 to 24 with the following paragraph:

Myogenic cells, such as allogenic cells, can be obtained from a patient to be treated, from a relative, or from another human, or cells may be obtained from another animal donor. In a typical procedure, 1 to 2 grams of skeletal muscle are harvested from a donor. Myogenic cells also can be cultured or produced by cloning methods known to those skilled in the art as shown, for example, in U.S. patent No. 5,130,141.
